## Mpoekt no Huchenhum Metodam N2

Бобровникова Василиса

PKU, 202

1) Cocmortue cucments Brancoli Moment bremeter 3 agalence Bermopour  $\vec{u} = (x \ y \ i \ \dot{y})^T$ 

b kareembe haralbubex zuareur Suru bzemen cuegypusue kumb:

решаем уравнение второго запона Ньютона:

$$\hat{y} = \frac{-4\pi^2 y}{(x^2 + y^2)^{3/2}},$$

$$\hat{y} = \frac{-4\pi^2 y}{(x^2 + y^2)^{3/2}}.$$

Ona pasicocurbica cueme ue reploro nopel gue:

$$\dot{y} = \sigma_{x}, 
\dot{y} = \sigma_{y}, 
\dot{y} = -\pi^{2}x \frac{4}{(x^{2}+y^{2})^{3/2}}, 
\dot{\sigma}_{y} = -\pi^{2}y \frac{4}{(x^{2}+y^{2})^{3/2}}, 
\dot{\sigma}_{y} = -\pi^{2}y \frac{4}{(x^{2}+y^{2})^{3/2}},$$

Чиспенное решение дле значений временного шала h=0.0002 проводилось шетодани RK2 4 верпе со старным шетодом Эйлера. Графики полученных орбит:
